

Anti-Corrosion Storage Intercept Shrinkfilm™

BENEFITS

- ★ Reduces overall manpower & packaging costs;
- ★ Protects all metals & elastomerics from atmospheric corrosive gases (chlorides, sulfides, ozone, nitrous oxides, etc.);
- ★ Protects items stored in crates from wood released acetic and formic acids;
- ★ Protects in any humidity and all typical storage temperatures;
- ★ No static charge generated in any humidity;
- ★ Protects all metals and elastomeric materials for up to 10 years per mil of Intercept resin indoors, less when exposed to UV outdoors unless coated with FPM's Shrinkwrap Coating System)
- ★ Inhibits mold/mildew on surface;
- ★ Applies like regular shrinkfilm;
- ★ Does not have shelf-life limit;
- ★ RoHS and EPA compliant.

mining equipment stored in Australian Outback

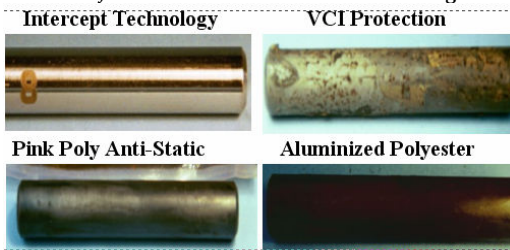

one of several AM General trucks in storage

“Static Intercept (SI) resin prevents 1ppm chlorine (marine layer concentration) from penetrating 2-mil of low density polyethylene (LDPE) with SI for 34.5 years compared to 7.4 days for regular LDPE” - Dupont Analytical Lab

No volatile chemicals involved - Intercept doesn't expose workers or equipment to contaminants

Independent ASTM B117 salt spray testing by ACI

Intercept Shrinkfilm™ is a revolutionary packaging system that solves the problems other packaging films can't. Instead of flooding the storage space with chemicals, or trusting that a vacuum will be maintained, Intercept sacrificially eliminates the corrosive gases that easily pass through other polyethylene films and which are trapped during initial packaging. This cleansing protection continues even with an imperfect seal or when temporarily opened by Customs or users. Because preservative chemicals or a vacuum are not involved, Intercept Shrinkfilm allows for a simple, one-step preservation process that requires no follow up management, hazardous chemical training, or shelf-life administration.

It is the most versatile anti-corrosive product available – anywhere – because it can be used to protect nearly anything, nearly anywhere, without contamination

concerns or temperature / humidity limitations, and protects for up to a decade.

Tested extensively and increasingly used by museums, Fortune 500 companies, US and foreign militaries, & transport companies. Approvals include: UK MOD; TACOM for various MIL-B-131 replacement; Rolls Royce; TRW; NASA; BMW; Ford; & more

Intercept Shrinkfilm™ is US-made and available from FPM Inc and its distributors.

simply better protection

FPM Inc. – the company that invented boat and aircraft shrinkwrapping, is a service-connected, disabled-veteran-owned small business (CAGE Code 48884), ISO 9001:2000 & 14001. For more Intercept information go to www.InterceptShrinkfilm.com or contact Randy Dutton 360-249-5833 PST at InterceptShrinkfilm@gmail.com. Sales at FPM HQ Flat Rock, MI USA, 800-222-4449 www.shrinkwrapping.com. GSA contract GS-15F-0025M.
