...simply better protection

Anti-Corrosive • Anti-Rust • Anti-Mold/Mildew • With Permanent ESD Properties

Intercept Shrinkfilm™

Static Intercept Shrinkfilm™:

Protection: A reactive barrier safe for all materials providing oil and volatile free long-term corrosion protection, mold / mildew protection in a format that is safe for indoor or outdoor storage due to industry leading UV protection

Appearance: Dark brown inner layer (Intercept) and High UV White Outer Layer

Style: Bags, Shrouds, Rolls (stock rolls & sizes listed below)

Expected Corrosion Protection Term: 4-10 Years; multiple years of protection based on material style, gauge, and aggressive environment level exposure

Description: Proven effective in demanding applications around the globe, enabling outdoor storage of equipment, stamping dies, parts, etc. Qualified at leading energy companies and extensive military and automotive applications

Note! The CF after the part # means the film is center folded (only folded one time, the roll will be as long as ½ the film width)
The G after the part # means the film is gusseted (has several folds and the roll length will be approx 4½ ft long)

| Size in feet | Part # | Price |
|-------------------|----------------|----------------|
| 12' x 250' x 4mil | SIS-12-250-4CF | Call for price |
| 12' x 200' x 6mil | SIS-12-200-6CF | Call for price |
| 14' x 200' x 6mil | SIS-14-200-6CF | Call for price |
| 14' x 150' x 7mil | SIS-14-150-7G | Call for price |
| 14' x 150' x 8mil | SIS-14-150-8G | Call for price |
| 17' x 150' x 7mil | SIS-17-150-8G | Call for price |
| 20' x 150' x 7mil | SIS-20-150-7G | Call for price |
| 20' x 150' x 8mil | SIS-20-150-7G | Call for price |

Corrosion Intercept™:

Style: Bags, Shrouds, Film, Sheets, Coated Paper and Corrugated, Saturated Foam

Expected Corrosion Protection Term: 2-3 Years; multiple years of protection based on material style, gauge, and aggressive environment level exposure

Environment: Excellent; #4 recyclable, reusable, low carbon footprint

Description: Corrosion Intercept® (CI) has the more recognizable Copper color, but it is designed for lighter corrosion duties than Static Intercept®. CI is the preferred choice for museum, archival, and consumer applications. CI is volatile free, safe, clean protection.

Note! The CF after the part # means the film is center folded (only folded one time, the roll will be as long as ½ the film width)
The G after the part # means the film is gusseted (has several folds and the roll length will be approx 4½ ft long)

| Size in feet | Part # | Price |
|-------------------|----------------|----------------|
| 12' x 200' x 6mil | CI2-12-200-6CF | Call for price |
| 14' x 200' x 6mil | CI2-14-200-6CF | Call for price |
| 14' x 150' x 6mil | CI2-14-150-6G | Call for price |

Custom Intercept Bag

We will make any size and any quantity Intercept bags from 1-bag to 1,000 000+ bags
